Technical specification

Genier GO! 150 FS
Mixer kettle

Net volumes:
- Net / Gross: 150 / 165 liters

Heating:
- Electric
- Steam

Installation:
- Freestanding

Mixer:
- Mixing speed 10 - 160
- 7 mixing modes, inc. auto-reverse
- Lid-open-mix when lid opened or kettle tilted
- Three-piece mixer tool with removable scrapers

Construction:
- Electronic tilting with adjustable tilt-back function
- 600mm tiltng height
- Jacket max. pressure 1.5 bar (128 °C)
- Kettle interior AISI 316 stainless steel, outer body
- AISI304L
- Removable stainless steel lid that can be rotated 360 degree in place
- Spring-loaded lid hinge
- Lid has a large grid openings with a separate lid for the grid

Control system
- 10" touch screen controller
- Set value for temperature 0...125 °C
- Temperature indication with 1 °C resolution
- Automatic temperature control based on jacket temperature
- Automatic food water
- Cooking programs memory
- Timed start for cooking programa
- Maintenance counters and helpers
- Service diagnostic for troubleshooting

Optional functions
- Automatic temperature control based on food temparature
- Automatic water supply with measurement
- HACCP reports memory
- Foot-pedal that enables e.g.lid-open-mixing

- Washing hose and storage compartment
- Enhanced mixing power
- Pt100 connection to external HACCP system
- Energy optimisation connection
- Hot cooking water connection and switch
- Soft water connection
- Cooling with mains water
- Emptying valve
- Floor-mounted installation

Accessories
- Measurement stick
- Strainer plate
- Washing tools
- Whipping tool
- Mixing hook
- Folding tool
- Wall holder for kettle tools
- Trolley for kettle accessories
- GN-tray holder
- Trolley for GN-tray

Technical information - Genier GO! 150 FS

- Volume, net/gross: 150 / 165 liters
- Weight, net/with transport package: 315 / 415 kg
- Tilting height: 600 mm
- Connections (flexible):
- Electric   (Electric model)   #E1   28,5 kW, 400V 3~, 50A, 50/60 Hz
- Electric   (Steam model)   #E2   2 kW, 230V 1~, 20A, 50/60 Hz
- Cold water   #2   DN 15, G1/2", 200...600 kPa (2...6 bar), Filtered to 15 µm *
- Warm water   (Option)   #3   DN 15, G1/2", max 60 ^{0}C, 200...600 kPa (2...6 bar)
- Hot water   (Option)   #4   DN 15, G1/2", max 80 ^{0}C, 200...600 kPa (2...6 bar), Filtered to 15 µm *
- Softened water   (Option)   #5   DN 15, G1/2", 100...600 kPa (1...6 bar), Filtered to 15 µm *
- House steam   (Steam model)   #6   DN 20, G3/4", 150...200 kPa (1,5...2 bar), 55 kg/h
- Condensate   (Steam model)   #7   DN 15, G1/2", Counter pressure 0 kPa (0 bar), downward line

* Water for kettle jacket: Filtered to 15 µm, 0...40 ^{0}C, max 5 ^{0}dH, conductivity 30... 1000 µS/cm, chloride max 100 mg/l, chlorine max 0,25 mg/l, pH 6,5...9,5

Genier GO! - Technical descriptions

INSTALLATION
- Free Standing Installation .
- Without the need for floor bolting. Making the kettle easy and inexpensive to install, and easy to move as needed.
- No need to pierce the waterproofing of the floor.

HEATING
- Electric model.
- Steam model.

CONTROLLER
- Large and easy-to-read 10-inch touch screen with clear and far-sighted information
- Electronic control for heating, water filling, and mixing.
- Large and easy-to-use control buttons for adjusting kettle functionalities. Only available functions are active.
- The touch screen can be locked during washing to avoid incorrect presses.
- An unactive touch screen can be placed in an energy-saving sleep mode, from where it returns to immediate use.

HEATING
- The heating is controlled based on the jacket temperature
- Temperature display with 1 °C resolution with clear numerical display. Adjustment range 0... 125 °C.
- The maximum pressure of the jacket is 1.5 bar.

MIXER
- Two-way rotary bottom mixer integrated into the bottom of the kettle, free to use in all positions.
- The mixing tool can be disassembled into three (3) separate parts weighing up to 3 kg. Enabling ergonomic handling of the tool when placing in and removing from the kettle.
- Mixing tool that can be disassembled and washed completely in a 500x500mm washing basket at a washing machine.
- The mixing tool is well suited for e.g. cold preparation, crushing, pureeing (eg mashed potatoes), mixing of mixes, kneading and whipping.
- Parts of the mixing tool can be replaced with special tools according to the prepared product's requirement.
- Stepless mixing speed selection between 10-160 (10-124 rpm)
- Seven (7) ready-made mixing programs are suitable for versatile food production. Mixing programs as needed can be self-modified.
- The mixer stops automatically if the kettle lid is opened.
- The mixer can be activated with a pulse switch when the lid is open, the kettle is tilted or the kettle is tilting,

FOOD WATER FILLING
- Automatic water filling is based on the selected liters of water or the amount of water added is measured.
- The water spout is located on the edge of the pot. It can be used with the lid closed and the kettle tilted.

TILTING
- Electric tilt.
- An adjustable tilt-back function that automatically stops the product from emptying from the kettle when tilting stops.
- When emptying, the kettle tilts from the height of 600 mm, which allows ergonomic working height and emptying even in large containers.

LID
- The lid is a durable stainless steel lid that is equipped with a spring-loaded hinge.
- The lid has a large safety grid (incl. separate lid) for adding ingredients.
- The lid is removable for transfer to the wash.
- The kettle lid can be rotated 360 degrees in place, allowing the lid to be wiped without reaching over the kettle.

CONSTRUCTION
- The top rim of the kettle is separated from the heating area so that the top of the rim does not become hot during cooking.
- Volume markings on the inner surface of the kettle.
- Kettle inner parts in contact with food made of AISI 316 acid-proof stainless steel.
- Kettle covers, stand, and other parts are AISI 304 stainless steel.

PROGRAMS
- User-programmable cooking processes,
- Two step programs with settings for cooking/chilling temperature and time, and mixing.
- The user can schedule their own cooking programs to start automatically

WASHING PROGRAMS
- Ready-made washing programs
- The washing attachments tools, which can be replaced, enables automatic cleaning of the inner surfaces of the kettle.
- Washing programs heat and dispense the wash water and start the washing tool.
- Wash complete notification with a summary of the energy and water consumption of the washing program.

USERS AND SETTINGS
- Service mode with service diagnostics and actuator tests directly from the controller display
- The user can customize the basic settings to suit his own needs.

SAFETY FUNCTIONS
- The pressure switch stops heating if the pressure in the steam jacket rises too high.
- The safety valve opens if the pressure in the kettle rises above the permissible level.
- The float switch prevents heating if there is too little water in the steam generator.
- A note text on display indicates the need for power separation.
- The tilt motor overcurrent limit prevents the motor from breaking.
- The tilt motor is equipped with a mechanical brake that prevents unintentional movement.
- The overcurrent and overheating limits of the mixing motor protect the motor.

COMPLIANCE
- The kettle fulfills DIN18855-1 standard for Rapid Kettle
- Compliant to CE requirements for safety
- Prevention of water pollution by backflow in accordance with EN 1717
- Manufactured in ISO 9001 certified factory.

FACTORY INSTALLED OPTIONS
- The heating controlled by automatic temperature control based on the food temperature. Including intelligent heating control to prevent burnout and reduce energy consumption.
- Automatic water filling based on the desired number of liters or measurement of the amount of water added.
- Foot pedal for hands-free control of safety mixing, tilting and water addition.
- Wash hose with pistol and storage case
- Extra Pt100 sensor for food temperature that can be connected to an external temperature monitoring system

Regethermic | Unit 4, 7-9 Orion Rd, Lane Cove West, NSW, 2066, Australia

We reserve the right to make changes without notice.

- HACCP reports from the cooking programs are stored in the kettle memory and can be transferred with a USB stick.
- Chilling performed with tap water (food water) which flows to drain: (CH3)
    - Activated from control panel or as a part of a program
    - Chilling temperature can be set. Chill-Hold function is activated if a chill temperature is set
    - Chill media is tap water which is led continuously to drain
    - At end of the chilling process the jacket is emptied automatically (to drain)
- Microfilter to be installed in the inlet water connection, replaceable filter cartridges.
- Emptying pipe, 2 ", for the front of the kettle. Echtermann valve by default
- Emptying pipe, 2.5 ", for the front of the kettle.
- Emptying pipe, 2.5 ", at kettle bottom with clamp connection to the user's own valve
- Enhanced mixing motors suitable for handling, for example, heavy mixes for cold production
- Active central axis that provides additional heating or chilling surface.
- Floor-mounted installation with the feet bolted to the floor
- Subsurface installation frame for floor-mounted installation

ACCESSORIES

- Measurement stick
- Strainer plate
- Washing tools
- Whipping tool
- Mixing hook
- Folding tool
- Wall holder for kettle tools
- Trolley for kettle accessories
- GN-tray holder
- Trolley for GN-tray
